RACCOLTA DOCUMENTI REGIONALI

Giulia Paola Di Nicola,
Tempo libero e minori a rischio (Free time and minors at risk), Edigrafital, Teramo 1990 (con interventi di Anna Maria Monti, Attilio Danese, Corrado Ranghi, Marco Di Raimondo)

This is a survey made on behalf of UNICEF-Abruzzo in order to know more about the problems of free time for pre-adolescents and adolescents through a representative collection of samples of populations attending the inferior medium schools. After a wide introduction, that frames the problematic of risk and free time, thanks to the immense sociological literature, the authors take under investigation answers given by girls and boys in a questionnaire distributed to 309 adolescents between 13 and 17 years old. There is a different distribution of time between school tasks, means, games, extra-curricular courses, hobbies etc. Variables that make the main qualitative differences in order to obtain the fruition of free time (from "a light" fruition to an engaged one) are: family life atmosphere, culture, social classes, minor or greater social centrality and social integration.

The articles of Attilio Danese and Marco Di Raimondo complete the book with investigations on more
